

## Register Your Cell or Internet Phone to Receive Emergency Messages

Cell phone users and VoIP (voice over IP) customers can now register their phone numbers to receive emergency notifications from Lakewood Police Department just like residents with landlines. The system works in a similar manner to what is commonly referred to as "Reverse 9-1-1." When a need exists to notify citizens in a certain area of the city, you can receive the notification on your cell phone or VoIP phone. The service, which is managed by the Jefferson County E911 Authority, is available to all residents of Jefferson County.

To register your cell phone or internet phone number visit <http://www.your911.net/>

If you do not have internet access or need assistance, contact the City of Lakewood Communication Center at 303-987-7111.
