## WEST CORRIDOR LIGHT RAIL PROJECT DESCRIPTION

The West Corridor project consists of 12.1 miles of Light Rail Transit (LRT) extending from the existing light rail line at Auraria West Station, west across the South Platte River, then west traversing the existing Associated Railroad right-of-way between Decatur Street in Denver and Quail Street in Lakewood as well as through the Lakewood Industrial Park, and crossing West 6<sup>th</sup> Avenue into the Denver Federal Center. West of the Denver Federal Center, the alignment, which was to run on the north side of West 6<sup>th</sup> Avenue along US 6 is being shifted to the south side of US 6 up to Indiana street where it will cross back over to the north side and parallel the highway at-grade within the CDOT right-of-way to the Jefferson County Government Center. The LRT project includes the development of twelve stations: Auraria West, Federal/Decatur, Knox, Perry, Sheridan, Lamar, Wadsworth, Garrison, Oak, Denver Federal Center, Red Rocks and Jefferson County Government Center. Parking will be provided at six of the 12 stations, providing approximately 5,700 parking spaces.

The LRT line will be double tracked and grade separated when required, but generally will be at-grade. Grade separations will include existing grade separated crossings at I-25, Federal Boulevard, and Colfax Ave; and new grade separations at Sheridan Boulevard, Wadsworth Boulevard, Kipling Street, US 6 from Lakewood Industrial Park to Denver Federal Center, Union at US 6, Eldridge at US 6 east of Indiana, Indiana Street, I-70, and US 6/US 40.
