## Compost Colorado - Sustainable Delivery Service: Simple Swaps Shop

In addition to providing a weekly compost collection service to Lakewood residents, Compost Colorado expanded its operations in 2020 to include an online delivery service stocked with local, sustainable and zero-waste products. The pandemic brought urgency for customers to safely get cleaning and medical supplies, and Compost Colorado quickly stocked its online store with necessities such as free hand sanitizer, all-purpose cleaner, hand soap and

dish soap. Dedicated to sustainable business practices, Compost Colorado is currently working to purchase and operate an in-vessel anaerobic digester that will be able to rapidly process organic kitchen waste in a small, low-impact centralized location. Compost Colorado innovation in supporting shifting community needs and focusing on the triple bottom line earns the company its second Lakewood Sustainability Award.

### Project Achievement Areas:

- Energy, Water, & the Built Environment
- Zero waste
- Community Cohesion & Public Health
